

Forest 'n' Funds – Final Game Rules

Core Flow

1. Player starts with **₹5000** and **24 dice rolls**.
2. Roll dice → player moves that many tiles along the 24-tile path.
3. Land on a tile → a **modal pops up** with details and options:
 - **Category tile (Food/Health/Education/Travel/Luxury)** → choose **Spend** (pay cost, grow plant) or **Skip**.
 - **Investment tile (2 total)** → option to deposit ₹200; returned with +25% interest at game end, plus small travel plant growth.
 - **Gamble tile (2 total)** → pay ₹100; 50% win or lose.
4. **Skip punishment:** if player skips **3 times in a row**, a random plant loses **5 growth**. This forces engagement.
5. Plants have **growth 0–100**, with 4 stages (seed, sapling, plant, full-flowered). Growth below 0 = plant vanishes.
6. **End condition:** after 24 rolls:
 - **Win if:** (a) total growth ≥ 300 , or (b) at least 2 plants full-flowered (≥ 75), and money ≥ 0 .
 - **Lose if:** money < 0 anytime (bankruptcy) or win condition not met at the end.

The 20 Category Tiles

Each plant category has **4 unique tiles** (20 total). Balanced so total cost ~5000 if player tries to buy everything, leaving room for bankrupt risk if they overspend.

Food Tiles

1. **Farm Fresh Groceries** – Cost: ₹200 → Growth +12
